Network Downtime Evaluation Checklist

Quick Self-Evaluation Form

	Do you use real-time network monitoring tools?
	Is preventive maintenance scheduled and documented regularly?
	Are cybersecurity protocols up-to-date and enforced?
	Has your IT team received recent training on network management?
	Are redundant systems or failover setups in place?
	Is there a documented and tested disaster recovery plan?
	Do you conduct root cause analysis after every network incident?
	Are your network policies reviewed and updated quarterly?
	Is your infrastructure optimized for your operational needs?
	Have you consulted with industrial networking experts recently?
